

When Students login to their blackboard course there will be a “Class Recordings” option they can select on the left-hand side. **\*PLEASE NOTE\*** if class recordings are made available to only an accommodated student, only the accommodated student with permission to view the recordings will see the “Class Recordings” option.

Once the student(s) with permission click on the class recordings option they will be brought to the overview page in Blackboard, and will then need to click the link (as pictured in the 1<sup>st</sup> screenshot below) which will redirect them to the Mediasite login webpage. The first time you access a recording each semester, you will be required to register with Mediasite. Please select register at the login page and input your UDC credentials to register with Mediasite. The final screenshot shows what the Mediasite page looks like for the student after registering.
